	Examiner Daniel C Crane	Art Unit 3725	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

BASIS FOR REJECTIONS

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

- (a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.
- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- (e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

REJECTION OF CLAIMS ON FORMAL MATTERS

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 4 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. This apparatus claim is dependent upon a method claim.

REJECTION OF CLAIMS OVER PRIOR ART

Claims 1-4, 8-12 and 30 are rejected under 35 U.S.C. 102(b) as being anticipated by Cole (1,889,823). See Figure II where the first member 11 is provided with a deforming end at the center of the first member and a deforming end at the periphery of the first member. Similarly, a second member 12 is provided with like deforming portions. Thinning of the material is caused by the variation in gap between the first and second members such that the material B is deformed in the first direction. Claim 4 has been examined as best understood per the objection noted above. As to claim 11, see Figure V.

Claims 1-12, 27 and 30 are rejected under 35 U.S.C. 102(b) as being anticipated by Langford (1,659,776). See Figure 6 where the material 27 is formed with a curve and the material is caused to move in a first direction. Because of the variation in gap between the first member 28 and second member 29, portions of the first member are closer at one end of the first member to the second member than other portions of the first member to the second member. As to claim 6, the first member is die 29 and the second member is die 28. See Figure 4 for a showing of how the first and second members are fixed and removably mounted within the press. A guide is shown at 33 in Figure 4.

Claims 32-34 and 36-42 are rejected under 35 U.S.C. 102(b) as being anticipated by Battersby (4,274,275). See Figures 1-4 where the material 10 is successively fed between two deforming portions 26, 30, 33 so that one of the edges 16 is compressed more than the other edge 17 (see Figure 2). Clamping is performed by clamping members 25 and 26.

INDICATION OF ALLOWABLE SUBJECT MATTER

Claims 13-26, 28, 29, 31 and 43 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

PRIOR ART CITED BY EXAMINER

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

RESPONSE BY APPLICANT(S)

Applicant(s) response to be fully responsive and to provide for a clear record must specifically point out how the language of the claims patentably distinguishes them from the references, both those references applied in the objections and rejections and those references cited in view of the state of the art in accordance with 37 CFR 1.111 (a), (b) and (c).

INQUIRIES

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Examiner D. Crane whose telephone number is **(571) 272-4516**.
